

VOTE ALEX WHITE IN THE REPUBLICAN PRIMARY FOR KY STATE SENATE MAY 22, 2018

SMALL GOVERNMENT

I believe in limiting the power of the legislature to ensure a non-restrictive government. If elected, **I'll fight to prevent interference with commerce such as price-fixing and the constant banning of industries that is choking our free market. We need term limits for state lawmakers**, and I will introduce legislation every year I am in office to give these to Kentucky.

FIGHT SPECIAL INTERESTS

We need to keep Kentucky's money in Kentucky. Put a stop to lawmakers bending over backwards to appease special interests like out-of-state insurance companies. Out-of-state interests such as Pfizer's PAC have worked to keep Kentucky out of the pain management industry by lobbying against the legalization of medicinal marijuana. Let's show Big Pharma that KY can be a player in the pain management industry with this alternative to the opioids they've used to flood our market and destroy so many lives.

DEFEND THE CONSTITUTION — INCLUDING THE SECOND AMENDMENT

This isn't about picking and choosing, eroding the parts we don't like. We all want safe schools, but **all reforms have to be Constitutional and calculated to actually save lives.** We can enforce schools as gun-free zones AND avoid making them soft targets. Further, we have to make sure we aren't selling out rights and guarantees we have under the Constitution to appease out-of-state special interests. We need to defend the Constitution — all of it — including the entire Bill of Rights.

SUPPORT PUBLIC EDUCATION

The powers of government should be limited to providing for clear public goods, and **a strong public education system is one of the most important public goods.** A well educated populace is essential to our functioning democracy.

NO TAX HIKES!!!

The pension crisis didn't happen overnight, and it won't be fixed overnight, but we need to start making good decisions! I'd start by literally shrinking government, **doing away with pensions for lawmakers and shortening the legislative session by a week each year**. We also need common-sense **reform to the current no-deductible, no-co-pay health insurance policies** such as Medicaid. An easy starting point: a \$25 co-pay for those on Medicaid for any ER visit for a medical issue deemed non-emergency. **We need incentives for those on social programs to comply with the best practices for receiving medical care**, both to control costs and to ensure our citizens are getting the highest quality of care. Finally, we need to be open to innovative revenue solutions.

GROW REVENUE THROUGH ECONOMIC DEVELOPMENT

Just one generation removed from state-wide tobacco farming, **we stand to grow our economy tremendously with the legalization of medicinal marijuana & industrial-scale farming of hemp**, a proven source material for everything from textiles to renewable energy. We have the infrastructure & know-how; we should grow and export these crops from our state. Further, **we must do a better job promoting tourism to our state** — Red River Gorge should be the Gatlinburg or Pigeon Forge of KY! Don't hike the gas tax; increase speed limits to grow gas revenue.

NEW ENERGY IN FRANKFORT!!

We MUST get away from the Good Old Boy system and back to REPRESENTING THE PEOPLE. As an attorney, it's my job to be client-focused for a living. **As your KY Senator, I will be constituent-focused.** I'll be available to listen and to **ADVOCATE** for the people of Jefferson and Oldham. I'll take the role of Senator as a seat of advocacy to represent District 26 from the bottom up, not from the top down.

REPUBLICAN ALEX WHITE FOR KENTUCKY STATE SENATE
